

Secours Rouge International

International Class Solidarity is our Weapon!

We, the Commission for a Red Aid International send you, the prisoners of the 10th of September, our revolutionary and class struggle solidarity for your 6th trial.

The capitalist crisis spiral is turning at a speed like never before, which leads to the destruction of jobs, more wars, the destruction of the environment and genocide.

With the growth of socio-political tensions the preventive character of the counter revolution grows as well.

An analysis of the counterrevolution and its preventive character is one of the most important tasks of the constitutional process of the Red Aid International and its members. Only the knowledge of the situation makes it possible for us, in the dialectics of revolution/counterrevolution, to develop the correct strategies, which enable us to turn the tables.

We very much agree with the Italian Communist prisoners of the PC p-m (Communist Party political-military) when they write:

„The rebirth of the revolutionary movement leads through the courtrooms and the prisons as an inevitable passage for militants who truly identify themselves with the revolutionary struggle.”.

Political trials are part of the revolutionary, anti-imperialist, class struggle. It is important for all of us who are in the Red Aid International process to collect and analyze the historical and current experiences concerning political trials and how to conduct them. The international class solidarity becomes a real weapon for us, which we must use collectively.

With these words we greet you, who have been dragged to the gates of the class justice and with all our strength we send you our solidarity.

Build and Defend International Class Solidarity! Freedom for all Revolutionary Prisoners!
